

Boots Medisure helps with medication administration. With today's busy lifestyles, managing lots of different medicines can be difficult to do. The Boots Medisure packaging has been **specially designed** to help you take the **right medicines at the right time** so that you can get **the best** from your treatment.

Convenient

All your capsules and tablets are in one pack. Each Medisure pack contains exactly seven days supply.

Easy to read

Morning, noon, evening and night time doses are sealed in their own bubble. Each bubble is clearly identified with the day and time to take the medicine, making it very easy to use.

Peace of mind

If you sometimes forget whether you have taken your medication, Boots Medisure will put your mind at ease. You'll be able to see and feel which bubbles have been emptied. You'll be able to relax knowing that you've taken your tablets and capsules at the right time.

In addition, the label clearly gives you any special information or warnings about your medication. For example, it may remind you that one of your medicines may make you drowsy. Please read any patient information leaflets provided as they contain important information about your medication.

Your Boots Pharmacist

Your Boots Pharmacist can make up your prescriptions in a Medisure pack, discuss your medication and answer any questions you may have. When you start on the Boots Medisure system the Pharmacist will discuss your medication with you, and record the dosing times for each of the medicines that will be placed in the pack. This information will be recorded on the attached form and kept for future reference. The Pharmacist will also review how you are getting on with your medicine and the Medisure pack on a regular basis.

Getting your prescriptions made up in a Boots Medisure pack

You will receive four packs at one time and you should use the packs in date order. Some medication is not suitable to go in the Medisure packs due to the nature of the tablet or capsule or because you only need to take it occasionally. These, and any liquid medicines, inhalers, creams and ointments will be dispensed in their normal containers.

Re-ordering your Medisure packs

To ensure that we can have your next supply of Medisure packs ready when you need them, please allow one week between ordering your repeat prescription and collecting your Medisure packs from your Boots store.

Boots Prescription Collection Service

You may be able to take advantage of the Boots Prescription Collection Service which will make life even simpler. Ask your local Boots Pharmacist for details.

Changes to your medication

If your doctor changes or stops some of your medicine or if any medication is dropped or lost, please contact your Boots Pharmacist for advice.

Getting started

If you would like your medication made up in a Boots Medisure pack, then please speak to your Boots Pharmacist who will take you through the start up process.
