Anusol Cream is a medicine which is used to relieve the pain, swelling, itch and irritation of internal and external piles (haemorrhoids) and other minor ano-rectal conditions such as anal itching. It can be used post-operatively following ano-rectal surgery.

Anusol Cream contains a vanishing base which means it is rapidly absorbed. The cream can also provide lubrication when used with suppositories. It contains the following ingredients:

- **Zinc oxide** which is an astringent which soothes and protects raw areas and helps reduce swelling. It also acts as an antiseptic.
- **Bismuth oxide** which is astringent and antiseptic and also protects raw, irritated areas around the anal area.
- **Balsam Peru** which is mildly antiseptic and has a protective action on sore areas and may help healing.

1 What the medicine is for

Anusol Cream is a medicine which is used to relieve the pain, swelling, itch and irritation of internal and external piles (haemorrhoids) and other minor ano-rectal conditions such as anal itching and fissures. It can be used post-operatively following ano-rectal surgery. Anusol Cream contains a vanishing base which means it is rapidly absorbed. The cream can also provide lubrication when used with suppositories. It contains the following ingredients:

- **Zinc oxide** which is an astringent which soothes and protects raw areas and helps reduce swelling. It also acts as an antiseptic.
- **Bismuth oxide** which is astringent and antiseptic and also protects raw, irritated areas around the anal area.
- **Balsam Peru** which is mildly antiseptic and has a protective action on sore areas and may help healing.

2 Before using this medicine

This medicine is suitable for most people but a few people should not use it. If you are in any doubt, talk to your doctor or pharmacist.

**Do not use this medicine...**

- If you have ever had a bad reaction to Anusol Cream or any of its ingredients.
- If the above applies to you, get advice from a doctor or pharmacist without using Anusol Cream.

**Talk to your doctor or pharmacist...**

- If you have rectal bleeding or if you are in doubt whether any bleeding you have experienced is caused by piles.

If any of these bullet points apply to you, talk to a doctor or pharmacist.

- If you are pregnant or breast-feeding
  - If you are pregnant you can use this product, but, as with all medicines at this time you should discuss it with your doctor first.
  - If you are breast-feeding you can use this medicine.

**Some of the ingredients can cause problems**

- Glycerol monostearate may have a mild laxative effect.
- Propylene glycol may cause skin irritation.
- Methyl (E218) and Propyl (E216) Parahydroxybenzoate may cause an allergic reaction, which may be delayed.

3 How to use this medicine

Anusol Cream is for topical use only, which means it is applied directly to the affected area.

- Wash the anal area and dry gently with a soft towel before using the medicine.

- There is a nozzle supplied with the product which can be used to apply the cream into the back passage (anus).

**For external piles** – after washing and drying the affected area, the cream should be gently applied to the affected area.

**For internal piles** – after washing and drying the affected area, screw the nozzle provided onto the tube, remove the nozzle cap; insert the nozzle into the back passage and squeeze gently. Clean the nozzle after each use.

- Wash your hands before and after using Anusol.

**Children (under 18 years):**

This medicine is not recommended for children under 18 years old.

**Adults and the elderly:**

**Age** | **Dose**
---|---
Adults and the elderly | Anusol Cream should be applied sparingly to the affected area at night, in the morning and after each bowel movement.

**Do NOT take orally**

**If anyone has swallowed this product**

If anyone accidentally swallows Anusol Cream, contact a doctor or your nearest Accident & Emergency Department (Casualty), taking this leaflet and pack with you.

**If you forget to use this medicine**

Anusol Cream should be used on an as required basis. However, if you were unable to use this product when needed, do not use a double dose next time you use it.
Possible side-effects
Anusol Cream can have side-effects, like all medicines, although these don’t affect everyone and are usually mild.

If you experience the following, stop using the medicine and tell your doctor:
■ Sensitivity reactions (such as a rash) which occur rarely.

Other effects which may occur include
■ Mild irritation or burning when applying the cream. This does not usually last a long time, so if this becomes troublesome or lasts longer than a few days, tell your doctor.

The above are mild side effects, which will usually stop when you stop using the cream.
If you experience any side-effects not included in this leaflet or are not sure of anything, talk to your doctor or pharmacist.

Storing this medicine
Keep out of the reach and sight of children.
Do not store above 25°C. Store in the original packaging.
Do not use your medicine after the date shown as an expiry date on the packaging.

Product Licence holder: McNeil Products Ltd
Maidenhead, Berkshire, SL6 3UG, UK.
Manufacturer: Famar Orléans, 5 avenue de Concy, 45071 Orleans, Cedex 2, France.
This leaflet was revised December 2009.
Anusol is a registered trade mark.

A Healthy Living Plan for Piles Sufferers
What are piles?
Piles (haemorrhoids) are swollen blood vessels which occur inside or outside the back passage (anus).

Symptoms
Some people have piles without experiencing any symptoms, but sufferers may notice the following:
■ Bleeding: Although streaks of bright red blood on the toilet paper are not uncommon in people with piles, it may be a sign of a more serious condition and you should see your doctor to check this.
■ Swelling: The swollen blood vessels may be felt as a lump or blockage in the anus.
■ Pain, itching and irritation in the anal region.

At least 40% of people suffer from piles at some time in their lives. However, many people are too embarrassed to seek advice or treatment and, as a result, suffer unnecessary discomfort.
Fortunately, there is much you can do to ease the situation and relieve the symptoms.

What causes piles?
A number of factors can contribute to the development of piles:
■ The most common cause is straining during bowel movement, usually as a result of constipation.
■ During pregnancy, the growing baby exerts increased pressure on the anal vessels, which can lead to piles.

Hereditry: you may be more likely to develop piles if your family has a history of suffering.

A Healthy Living Plan for Piles Sufferers
You can reduce the risk of piles by following a healthy diet and lifestyle that helps to keep your bowels working regularly and prevents constipation. This can also help to speed recovery from piles.
■ Eat a high fibre diet including foods like brown rice, wholemeal bread, wholewheat pasta etc.
■ Eat plenty of fresh fruit, vegetables and salads.
■ Drink plenty of water.
■ Don’t eat too much salty, fatty or sugary foods such as crisps, burgers and cakes.
■ Cut back on the amount of alcohol, tea and coffee you drink.
■ Exercise regularly.

A healthy diet and lifestyle will reduce the likelihood of constipation and encourage a regular bowel habit. Go to the toilet regularly and try to avoid straining. Leaning forward from the hips may help.
For external and internal piles, Cream can be used. If internal haemorrhoids are the problem, Suppositories deliver a measured dose to the affected area.
