Read this leaflet carefully because it contains important information for you.

1. What your medicine is and what it is used for

Each tablet contains: 300 mg of Aspirin BP, 200 mg of Paracetamol Ph Eur and 45 mg of Caffeine Ph Eur.

Aspirin and paracetamol work by relieving pain and reducing high temperature and fever. Aspirin belongs to a group of medicines called Non-Steroidal Anti-Inflammatory Drugs (NSAIDs) and has anti-inflammatory properties. In addition, your medicine contains caffeine, which increases the pain-relieving effects of the product.

Your medicine is for effective relief from mild to moderate pain including headaches, migraines, sharp pains caused by pulling or tearing muscles, toothache, pains felt during or after meals, period pains,dynapathia (feeling of burning, itching, sweating, fevers), joint pains, pains of the lower back or legs (sciatica), lower back pain (lumbago), chronic muscle pain, sometimes with tiredness and skin sensitivity (fibrositis), muscular aches and pains, joint swelling and stiffness, influenza, feverishness and feverish colds.

2. Before you take your medicine

Please read the following information. There is a possibility of interaction between aspirin and Reygadin Extra when given to children. Reygadin Extra is a very rare disease, which affects the brain and liver and can be fatal. For this reason aspirin should not be given to children aged under 16 years, unless on the advice of a doctor.

Do not take if:

- you are allergic to aspirin, paracetamol, caffeine, or any of the other ingredients listed in this leaflet.
- you have ever had a stomach ulcer, perforation or bleeding
- you have ever had pain in the stomach that does not go away or from past or present stomach ulcers
- you are in late stages of pregnancy
- you are breast-feeding
- you have or have ever had a stomach ulcer, perforation or bleeding
- you have liver or kidney disease (including alcoholic liver disease)
- you have or have ever had a stomach ulcer, perforation or bleeding
- you have or have ever had a blood disorder (including sickle cell disease or G-6-PD deficiency (an inherited condition leading to low red blood cell count))

Take special care and talk to a pharmacist or your doctor before taking this medicine if you:

- suffer from arthritis, allergic disease, depression, fever or kidney disease (including alcohol, liver disease) or G6PD deficiency (an inherited condition leading to low red blood cell count)

3. How to take your medicine

For oral administration and usual term use only.

Design: Adults, the elderly and young persons aged over 10:

The minimum effective dose should be used for the shortest time necessary to relieve symptoms. Take 2 tablets up to 4 times a day, as required. The tablets should be taken with water. Take only as much as you need to relieve your symptoms and leave at least 4 hours between each dose. Do not take more than 4 tablets in any 24-hour period.

Do not give to children aged under 10 years, unless on the advice of a doctor.

4. Possible side effects

Like all medicines, your medicine can cause side effects, although not everybody gets them. You can reduce the chance of experiencing side effects by using minimum dose required. Side effects may be more serious in elderly patients.

If you experience any of these effects stop taking this medicine and contact your doctor or pharmacist.

Other side effects include indigestion, heartburn, feeling or being sick, changes in skin colour, breathing problems, thirst and sweating, abdominal pain (epigastric pain), dermatitis. Occasionally very rare side effects include infectious skin reactions, blood disorders and blood sterility.

5. How to store your medicine

Do not use this medicine if you are taking medicines that reduce blood clotting (warfarin) or for treatment of gout (sulphinpyrazone).

Your medicine is manufactured by: Wyeth Lederle SpA, Via Nettunense, 90 - 04011 Aprilia (LT), Italy.

Your medicine is available in packs containing 8, 12, 16 or 32 tablets. The 32 tablet pack is available only from your pharmacy.

Do not exceed the stated dose.

Do not take with any other paracetamol-containing products.

If symptoms persist for more than 3 days or if symptoms worsen, consult your doctor or pharmacist.

If you take more tablets than you should:

Do not exceed the stated dose.

Do not use this medicine if you are taking medicines that reduce blood clotting (warfarin) or for treatment of gout (sulphinpyrazone).

Do not exceed the stated dose.
