

## What do our patients say about us? (UK)

Summary In our most recent Boots Online Clinics survey, 96% of patients who responded stated they were treated with respect during the consultation, 95% were satisfied that the benefits and risks of the service were explained and 96% said they understood the information in the consent section of the form.

Of those who expressed an opinion about the online clinic service used, their level of satisfaction with the following was...
