trust us to make things easier

As one of the pioneers of medication administration systems in the UK, Boots The Chemists have a detailed understanding of the requirements of the care sector when it comes to medicine administration, which is why we are pleased to introduce our new Assisted Living service.

Boots Assisted Living is a simple, yet helpful, medication administration system designed to help residents living in extra care facilities maintain their independence. It helps residents who choose to look after their own medication, take the right medicine at the right time so that they can get the best from their treatment.

Boots Assisted Living is provided FREE of charge and is available nationally from more than 350 of our stores.

right dose, right time

Regular medication is provided in 28-day pill packs, which are colour coded for the time of day. The time of day is clearly indicated on dividers that are used to separate the pill packs.

- pink = morning
- yellow = lunch time
- orange = tea time
- blue = night

Also provided is a resident file card, which has space for the care notes and allergies along with name of the resident, their room number and their GP name.

The pill packs, dividers and resident file card are then placed on one file, which is small enough for the resident to keep in a drawer in their own room.

re-ordering medication

We make ordering and delivery as simple and straightforward as possible. We will agree an appropriate, prescription ordering process with the resident or their carer so that monthly medication is ordered in good time.

advice and support at your fingertips

Alongside our easy to use system, we also provide ongoing support from our dedicated team who work within our specialised dispensaries. They are there to offer advice and support as and when you need it.

- **Your Key Contact** is an expert in our medicine administration systems and is your dedicated point of contact within the store. They are fully committed to providing you with the best possible service.
- **Your Boots pharmacist** is on hand to discuss any aspect of medication administration and answer any questions you may have. They will also be able to provide you with details of any additional services available from your local Boots store.

like to find out more?

We hope you like what you have seen and want to find out more about the Boots Assisted Living service. If you would like to find out more about how Assisted Living could help, please contact:
