- Side effects can rarely occur when using this product: see section 4.

Now read the rest of this leaflet carefully. Keep this leaflet. You may need to read it again.

1. What this product is for

Echinaforce is a traditional herbal remedy used to relieve the symptoms of:

- Cold
- Flu
- Upper respiratory tract infections

Echinaforce helps maintain the body's resistance by supporting the immune system.

2. Before you take this product

Do not use this product

- For children under 12 years of age.
- If you are **allergic** to
 - Echinacea or plants of the daisy (Asteraceae/ Compositae) family. Echinacea is a member of the daisy family.
 - Any of the other ingredients in this product (see section 6)
- If you **have a tendency** to allergies such as hives, allergic eczema or asthma consult your **doctor** before use. This product may not be suitable for you.
- If you are **pregnant** or breast-feeding.
- If you are **taking another medicine** which is affected by **alcohol**.
- If you are having treatment to reduce the response of your immune system (immunosuppression) e.g. chemotherapy, radiotherapy.
- If you are taking ciclosporin or methotrexate, or any other immunosuppressant medicine.
- If you have had an organ or bone marrow transplant.

- If you **suffer** from
 - TB (the infection tuberculosis)
 - Sarcoidosis (a connective tissue disease disorder which causes the formation of clumps of cells mainly in the lymph nodes, lungs and liver)
 - An autoimmune disease such as collagenoses (inflammation of the connective tissue) or multiple sclerosis
 - HIV, AIDS or any other condition which decreases your resistance to **infection**
 - A disorder which affects your white blood cells such as agranulocytosis (low white blood cell count due to bone marrow disorders) or leukemia (blood cell cancer)

You should also know

- This medicinal product contains 65 vol % ethanol (alcohol), i.e. up to 348 mg per 15 drop dose, equivalent to 7.8 ml beer (less than a tablespoon) or 3.25 ml wine (less than a teaspoon).
- If you suffer from alcoholism the alcohol content of this product may be harmful.

- If you are in a high risk group (patients with liver disease or epilepsy) you should consider the alcohol content before taking this product.

Using

3. How to take this product

Adults, elderly and children over 12 years: Take 15 drops (0.6 ml) in a little water two to three times daily.

Not for use in children under 12.

Start taking this product at the first signs of a cold.

For oral use only. Do not take more than the recommended dose.

Do not take this product for a cold or flu for more than 10 days.

If you take too much

- If you take too much and feel ill, talk to your doctor. Taking too much is unlikely to be harmful.
- Overdose of this product may result in alcohol intoxication and should be treated accordingly (see section 2 'You should also know').

If you forget to take this product

- Don't worry about the missed dose. Take the next dose as usual.

If you feel this product isn't working

Stop taking this product and see your doctor:

- If you have a high temperature (fever)
- If your symptoms worsen or if you don't feel an improvement within 10 days
- Adverse events not mentioned in the patient information leaflet occur

Driving and using machines

- This product contains alcohol (see section 2 'You should also know' for alcohol content).

Side effects

4. Possible side effects

Like all medicines, this product can cause side effects, although not everybody gets them.

Side effects

Allergic reactions

If you already suffer from allergies you may be more likely to get them. Allergic reactions which may occur are:

- Skin rash
- Red, itchy skin (hives)
- Swelling of the skin due to fluid (angioedema) or swelling of the face (Quincke's oedema)
- Blistering of the skin and mucous membranes (Stevens-Johnson syndrome)
- Difficulty in breathing (bronchospasm with obstruction)
- Asthma or anaphylactic shock (a life-threatening allergic reaction)

Stop taking this product immediately if any of these occur. Seek medical advice and take this leaflet with you.

You can get a larger
this leaflet. Call this n

There have been isolated reports suggesting an association between Echinacea products and autoimmune diseases such as:

- Inflammation of the brain and spinal cord (disseminated encephalitis)
- Painful lumps on the shins (erythema nodosum)
- Low blood platelet count (immunothrombocytopenia)
- Destruction of blood cells by antibodies (Evans Syndrome)
- Dryness in the mouth and eyes with renal tubular dysfunction (Sjögren Syndrome)

A decrease in the number of white blood cells (leucopenia) may occur in long-term use (more than 8 weeks).

The frequency is not known. This means it is not known how often these reactions occur as there has not been enough reports to allow this information to be calculated.

If you notice any side effects not listed in this leaflet, please tell your doctor or pharmacist.
