

LOT, MAN & EXP
Overprint area

- sodium methyl, sodium ethyl and sodium propyl parahydroxybenzoates (E215, E219) which may cause allergic reactions (possibly delayed).
- less than 1mmol sodium (23mg) per 5ml dose, that is to say essentially 'sodium-free'.

2. Possible side effects

Like all medicines Covonia Mucus Cough Oral Solution can have side effects, although these don't affect everyone.

Possible side effects are:

- Allergic reactions such as dermatitis, skin rash, flushing and itchy lumps.
- Higher sodium salt and water levels within the body.
- Low blood potassium levels within the body.

Unbalanced potassium and sodium levels may produce side effects of muscle weakness, confusion, disorientation, and irregular heartbeat.

- Gastrointestinal reactions such as abdominal pain, vomiting and diarrhoea.

If you notice these or any other side effect not included above, stop use and tell your doctor or pharmacist. They will tell you what to do.

Reporting of side effects

If you get any side effects, talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed in this leaflet.

You can also report side effects directly via the yellow card scheme at: www.mhra.gov.uk/yellowcard or search for 'MHRA Yellow Card' in the Google Play or Apple App Store.

By reporting side effects you can help provide more information on the safety of this medicine.

Peels from here

Covonia Mucus Cough Oral Solution contains liquorice and squill which belong to a group of medicines known as expectorants. They help remove phlegm in people with chesty coughs. Menthol helps relieve congestion in chesty coughs and bronchitis.

1. Before you use this medicine

- **Do not use the medicine if you have....**
 - An **allergy** to any of the ingredients listed in section 3.
 - Any type of **heart complaint**.
- **Talk to your doctor if you are taking....**
 - Carbenoxolone for a stomach ulcer.
 - Medicines which help remove fluids from the body (e.g. water tablets).
- **Pregnant or breastfeeding....**

Ask your doctor or pharmacist for advice before using this medicine if you are pregnant, might be pregnant or are breastfeeding.

■ Important ingredient information

This medicine contains:

- 282mg of alcohol (ethanol) in each 5ml dose. The amount in 5ml of this medicine is equivalent to less than 7ml of beer or 3ml of wine. The small amount of alcohol in this medicine will not have any noticeable effects.
- 1.3g glucose and 1.3g sucrose per 5ml dose. This should be taken into account in patients with diabetes mellitus. If you have been told by your doctor that you have an intolerance to some sugars, contact your doctor before taking this medicine.
