Bacterial Vaginosis Vaginal Pessaries

Canesbalance® Bacterial Vaginosis Vaginal Pessaries contain lactic acid clinically proven to effectively treat the symptoms of Bacterial Vaginosis by restoring normal pH and vaginal flora.

What is Bacterial Vaginosis (BV)?
 BV is a very common vaginal condition. Normally, different types of bacteria live naturally in the vagina; the ones present in the largest numbers are lactic acid bacteria, called lactobacilli. Lactic acid bacteria produce acidifying lactic acid, which maintains the normal low pH of the vagina and protects it against infection. When the numbers of lactic acid bacteria are reduced and pH levels rise, there is a change to the normal environment and an undesirable growth of other bacteria occurs. This condition is known medically as Bacterial Vaginosis. The main symptoms associated with BV are unpleasant fishy odour, abnormal discharge and discomfort in the vagina.

What causes Bacterial Vaginosis?
 Factors that alter the vaginal environment and can cause BV include prolonged menstruation, frequent vaginal douching, contraceptives, vaginal medications, sexual intercourse and stress. Courses of antibiotics and the use of an Intrauterine Device (IUD, commonly known as the coil) can also affect the balance in the vagina.

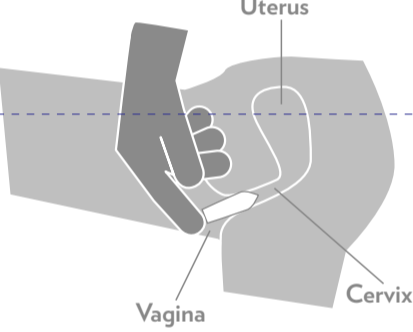

Canesbalance® Vaginal Pessaries treat the symptoms of BV - in a natural way
 The pessaries contain lactic acid, which restores the normal pH of the vagina and therefore effectively neutralise the unpleasant odour. It also contains glycogen, which provides nutrients to the lactic acid bacteria and supports their growth. With normal pH and nutrients, the protective lactic acid bacteria grow and the natural vaginal flora is restored. As a result, the abnormal discharge, unpleasant odour and discomfort are effectively relieved.

When to use Canesbalance® Vaginal Pessaries?
 It is best to use this product at bedtime. It may be helpful to wear a panty liner as it is common to notice slight leakage. This does not mean the treatment has not worked.

How to use Canesbalance® Vaginal Pessaries?

Treatment	For the effective relief of unpleasant odour, abnormal discharge and discomfort caused by BV.	Use 1 pessary daily for 7 days
------------------	---	--------------------------------

Canesbalance® Vaginal Pessaries are easy to use
 The pessary is to be inserted deeply into vagina. The pessary may not be divided as it is intended for a single use.

Canesbalance® Vaginal Pessaries containing lactic acid, clinically tested
 Clinical trials have shown that lactic acid formulations are safe and effective. It has a triple benefit as it effectively relieves unpleasant odour and abnormal discharge by restoring pH balance, promoting the growth of good bacteria (lactobacilli) to restore the natural environment.

Canesbalance® Vaginal Pessaries are safe to use
 Canesbalance® Vaginal Pessaries come in hygienic single use foil wrapper. The pessaries can be used during pregnancy and during menstruation. However, you should see your doctor if you think you may have a vaginal infection during pregnancy.

You should avoid using this product if you are trying to conceive (see **Caution**). Canesbalance® Vaginal Pessaries may cause stinging, a burning sensation or itching when there are cracks in the vaginal tissue. This is only temporary. If this persists, stop use and if you are concerned, seek medical advice.

When should you see your doctor?

Contact your doctor if your symptoms worsen, if you experience pain, if the discomfort does not cease, if your discharge is blood-stained or if your discharge occurs during the menopause. You should see your doctor if you think you may have a vaginal infection during pregnancy. If you experience no symptom relief after using Canesbalance® Vaginal Pessaries as instructed, you should contact immediately your doctor for further advice.

What does the pack of Canesbalance® Vaginal Pessaries contain?

This pack contains 7 comfort-shaped single-use vaginal pessaries.

Each pessary contains the following ingredients:
 Macrogols, Lactic acid, Sodium Hydroxide, Glycogen, pH 3.6-4.2.

Contains no preservatives. Hormone free. No perfume.

Warnings

Do not use if pessary is damaged. Do not use if pessary is past its expiry date. Keep out of the reach of children. Do not use if you have any known allergies to any of the ingredients. Not intended to be used by or on children.

Caution

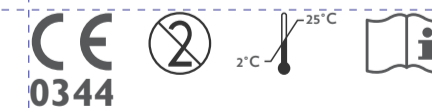

Canesbalance® Vaginal Pessaries are safe to use during pregnancy, however, you should see your doctor if you think you may have a vaginal infection during pregnancy.

Avoid using Canesbalance® Vaginal Pessaries if you are trying to conceive, as the pessary has a low pH which can make the environment less suitable for sperm. Do not use as a contraceptive.
